

Peer Mentoring Program

Peer mentoring is a relationship between people who are at the same career stage or age, in which one person has more experience than the other in a particular domain and can provide support as well as knowledge and skills transfer.

The peer mentor will work with the client and client family to create or strengthen each family's connections to community organizations and activities. They will do this by:

- Providing assistance in accomplishing goals stated in the service plan
- Developing, with the family, strategies to connect the client and the client's family with community resources, based on their interests and needs
- Bringing the client and the client's family together with local community members
- Gather information needed to enhance the participation of client and the client's family in their community
